

Our Philosophy

A proper education shapes and cultivates the mind to reason and to think critically therefore leading to a wise and virtuous student. This is best achieved by providing the student with a classical Christian education in an environment that is both engaging and focused on acquiring knowledge and skills. Acquiring knowledge and skills are not enough; the ability to gain a deeper understanding and perspective of the world and possess the ability to communicate effectively is paramount to a well educated mind. This training crafts the student to become an independent and sophisticated thinker.

Education at The Academy is challenging and requires mutual respect and commitment between the teacher, the student, and the parent(s). The role of the teacher is to be model, mentor and instructor. Each student is unique and therefore our learning environment strives to help each student reach his or her fullest potential. The classroom environment must be a place where a student feels safe and valued and where achievement is expected and encouraged.

While the curriculum is traditional and academic, it is also rich in opportunities for creative experience and expression. We believe that only upon knowledge can creative potential best be realized and self-expression most fully developed.
